# BIO-K2000

Assists with one with one of the major problems in our industry.

Which problem? please read on...

We have a  
100% Money Back Guarantee  
on our product

The product of the Future available NOW.

**BIO-K 2000** is 100% natural and has been put together by a Master Herbalist and a food scientist and is guaranteed to help prevent bleeding, from the lungs and will assist in the overall health and performance of the horse

*It will help:- strengthen the small blood vessels, improve function of the kidneys, lessen the blood pressure, so minimising the possibility of blood vessels bursting and gives a boost of energy when required.*

**BIO-K 2000** should always be given at night with the feed. This is so it has all night to be taken up by the blood, when the horse exercises in the morning, the spleen vents its supply of blood, (up to 12 litres) and at the end of the exercise, the blood is drawn back into the spleen. Each time the horse is given **BIO-K 2000** and exercised then rested, it retains more and more of the product in the spleen. So, on race day when the horse starts out of the barrier, the spleen vents its 12 litres of blood plus all the stored **BIO-K 2000**, this is the bonus that the horse needs for the extra energy and bleeding control during the race. Full product information, and dosage is supplied with each container

When the recommended dose is followed 1 Kg should last approx 5 to 6 weeks, and it only takes about 5 days to become effective

This represents tremendous value for money

**1Kg of BIO-K 2000 costs only \$120 plus \$10 p/h**

### HOURS

The Club is aware of suggestions that if certain procedures are followed, the training of horses outside of daylight hours is acceptable.

Given this advice, Committee asked the Tasmanian Racing Authority to indemnify the Club, its Committee and staff against the possibility of legal action if damage was caused by an accident on the track outside daylight hours.

That indemnity was not forthcoming, see the extract of the TRA'S response below, so the Club is not in a position to permit training outside of daylight hours. The change of rules etc do not over ride the provisions of Workplace Safety Legislation.

The inconvenience is regretted but under the circumstances, unavoidable.

Van Ransley  
**SECRETARY**

22nd December 1997

Dear Mr Ransley

### TRAINING OF HORSES OUTSIDE DAYLIGHT HOURS

I acknowledge receipt of your letter of 16 December last, in relation to the abovementioned matter, and note your Club's legal advice as enclosed therewith.

The Authority is not prepared to indemnify race clubs in respect of any liability arising from use of their properties for the training of racing animals. Such action would be inappropriate considering that the Authority does not have control over those properties.

Accordingly, we are unable to accede to your request.

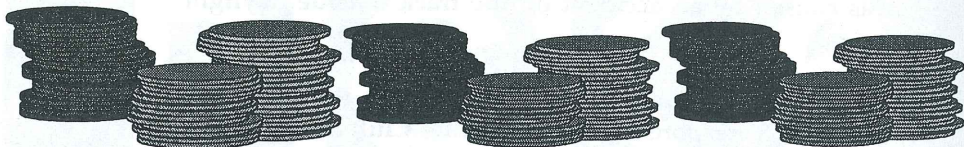

Yours faithfully  
DH Peters (DIRECTOR OF RACING)

## OLD PHOTOS

The Club has in its possession many old photos which eventually will find their home in a museum which is a long term goal.

In the meantime, a programme has commenced to have several of them reconditioned. This will involve some replacement of frames, some aren't in frames and some just need a good clean up.

The work is being done progressively and in the short term the finished products will be hung in the Club offices.

Sponsorship of a reconditioning is available at \$60 and this will entitle the sponsor to the recognition plate attached to the photograph, and acknowledgement in the Club's race book.

Inspection and enquiries of the Photographs can be directed to Club office or call on 62 726 121.

# OUR MILK COMES FROM GREEN COWS.

The cows that provide the milk that goes into Australia's favorite chocolate are a good-natured and environmentally -friendly lot.

And why wouldn't they be, given the clean, crisp air and lush, green pastures that the bounteous climes of northern Tasmania treat them to?

But that's the way it's been from the beginning when, over sixty years ago, Cadbury selected Claremont, on the banks of the beautiful Derwent River in Tasmania, as the perfect location for their chocolate factory. And from the outset, quality has been the cornerstone of the Cadbury operation.

Today, premium cocoa beans are sourced from ideal equatorial climates such as Ghana, Malaysia and New Guinea.

The cocoa beans are delivered to the Claremont plant roasted and finely ground - ready for production. Next comes the fresh, full-cream milk, delivered daily from local farms to the Cadbury condensing plant at Burnie, where it is twice tested for purity.

It's then transported by road tanker to the factory at Claremont, and mixed with pure Australian sugar and the prepared cocoa.

The liquid chocolate mixture is then rolled and pumelled (a brutal process that results in its unique delicate texture), before being poured into moulds, cooled and finally wrapped in the familiar purple and gold Cadbury packaging.

And true to the famous Cadbury claim, every 200 grams of Cadbury Dairy Milk Chocolate contains the equivalent of a glass and a half of full-cream milk.

Which naturally appeals to chocolate-loving Australians everywhere. Because it seems they appreciate the quality of the natural ingredients which provide the wholesome goodness and great taste that Cadbury delivers - and always has done.

And the green dairy cows of Tasmania clearly enjoy being in clover.

## TRACK CLOSURE

During the Inter Dominion Carnival, the Pony Inter Dominion will also be conducted. Ponies from most States will be taking part and most of those from interstate will be stabled at the Showground.

In order for them to have access to training facilities during their stay, **the track will be closed to all but ponies from 12.30 to 1.30 each day** except Mondays when ponies will have access after greyhound trials are completed.

Your assistance and co-operation is appreciated by the Tasmanian Pacing Club and Des Berry and his Organising Committee.

### Dear Participant,

- (1) The Club is concerned as we are sure you are, with the possibility of a child being injured in the area of the race day stalls and seeks your help in minimising the potential risks.

It would be appreciated if at any time that you have children in your care, they are maintained under your control and not exposed to unnecessary dangerous situations during a race or trial meeting.

Whilst it is recognized that in lots of cases the children are totally at ease around horses, unfortunately accidents do happen and none of us wants any person injured particularly not children.

We hope that you will understand the Club's concern and help us make the environment a little safer.

- (2) During the period of the Cadbury Inter Dominion, only people with appropriate passes will be permitted in the restricted stable area. This policy has been arrived at by the Club in consultation with and at the request of Harness Racing Tasmania's Stewards.

The passes will be issued to participating trainers, drivers, nominated strappers and owners of participating horses. Consequently, unless a child is old enough to be acting as a strapper for a specific horse and is issued with the suitable pass, (in which case no other person will be accredited as a strapper for that horse), children will not be admitted to the stabling area.

- (3) Where authorized people entering the stables have children in arms the child will be admitted.  
**PRAMS AND STROLLERS WILL NOT BE ADMITTED TO STABLING AREA.**

Whilst these provisions have been introduced prior to the Inter Dominion, they are safety issues that will impact on the industry. The conditions will be retained in some form after the Inter. Your understanding and co-operation with these three matters is appreciated.

## IMPORTANT RULE CHANGE

LR 38B

'Any trainer who wishes his horse to use the urinal within one (1) hour of their scheduled race start time must first seek permission from the Chairman of Stewards'.

**NOTE THIS RULE IS TO COME INTO FORCE AS FROM 24TH FEBRUARY 1998**

**Wayne Kirby**  
**CHAIRMAN OF STEWARDS**

## FALSE STARTS

The THRB has adopted the following policy in respect of false starts in mobile races, to commence from 8/4/94.

Firstly, if a horse misbehaves and causes a false start, it will score up from its allocated barrier position for the second attempt. (In extreme cases, Stewards may still scratch a horse or send it to the outside after the first offence),

Secondly, if it again causes a false start it will be sent to the outside.

The starter will still call false starts only if a horse is interfered with or denied a fair chance to start. No false start will be called simply if a horse misbehaves without interfering with other runners.

Tasmania was the only State which sent an offending horse to the outside after it caused a first false start.

The procedure outlined above is in line with the system currently operating in Victoria.

# TAFE Tasmania congratulates the trophy winners

They were on a winner.

The Institute of Industry is proud to have made the Inter Dominion trophies. It's another example of the skills TAFE contributes to Tasmania.
